

Huawei Japan New solar container battery Project

Overview

When will Huawei start selling a large-scale battery system in Japan?

According to NikkeiAsia, Huawei will start selling the large-scale battery system for renewable energy storage in Japan in March 2022. As per the information, Japan is moving away from fossil fuels and shifting to renewable energy. The nation aims to have renewables account for 36% to 38% of energy generation by 2030.

When will large-scale battery storage be available in Japan?

With the growing demand for renewable energy, large-scale battery storage will be needed to conserve the power for a stable supply. According to NikkeiAsia, Huawei will start selling the large-scale battery system for renewable energy storage in Japan in March 2022.

What are Huawei energy storage systems?

In the rapidly growing large-scale energy storage industry, Huawei's energy storage systems have earned widespread recognition in the Japanese market. Huawei is introducing the next-generation LUNA2000-4472-2S and LUNA2000-4.5MWh battery energy storage systems, both offering higher energy density through the latest liquid cooling technology.

Does Huawei have a small battery system in Japan?

However, Huawei is already a supplier of the small household battery system in Japan. Now, the Chinese tech maker will purchase small battery packs from CATL and bundle them into shipping container-sized units that can each store 2,000 kilowatt-hours of energy — roughly 200 times as much as a standard home battery.
