

Hungarian explosion-proof UPS uninterruptible power supply equipment

Overview

What is the iups101 uninterruptible power supply system?

The iUPS101 Uninterruptible Power Supply system is certified for use in ATEX and IECEx Zone 1 and 2 hazardous areas. It provides back up power to protect critical equipment, such as instrumentation and control systems, navigation and landing lighting, or blow out prevention systems, in the event of a blackout or brownout. Want to find out more?

.

Why are uninterruptible power supplies important?

Uninterruptible power supplies (UPS) are becoming increasingly significant as the importance of decentralized power sources grows and the dependability of power supply networks declines. Especially for applications that are safety essential or have a high need for plant availability.

What is a modular UPS system?

Where maximum system availability is required in hazardous areas, R. STAHL's modular UPS system allows bespoke solutions to be devised in order to guarantee the uninterrupted supply of power to the system.

Why should you use Stahl's uninterrupted power supplies?

R. STAHL's uninterrupted power supplies (UPS) prevent your company from incurring the high financial losses that can result from voltage drops and power failures. They balance out brief fluctuations and, in the event of extended power outages, ensure that your systems are shut down in a safe, controlled manner.
