What is hypobaric storage?

Hypobaric storage is a system of storing commodities while ventilating with air at less than atmospheric pressure. being changed in order to maintain the desired O level. This is achieved by a vacuum pump evacuating the air from the store. The store atmosphere is constantly being replenished from the outside. The air inlet and the air evacuation.

What is a hypobaric container?

the hypobaric containers, but abnormal softening unrelated to disease occurred in 4 to 45% of fruits of one packer. It surface lesions than those stored in a refrigerated container at normal atmospheric pressure. air with heated water, was designed by Stanley Burg (Burg 1993). The system was described by Burg (2004) and is
