

# **Industrial energy storage project in Toronto Canada**

## Overview

---

What is Canada's largest battery storage project?

A major battery storage project in Canada, said to be the country's largest, is advancing after the majority owner announced it has fully secured financing. Toronto-based Northland Power Inc. leads a consortium that plans to build the 250-MW, 1,000-MWh Oneida Energy Storage site in Haldimand County, Ontario.

What is the fastest growing energy storage technology in Canada?

BESS is the fastest growing energy storage technology in Canada and is also the dominant storage technology in terms of capacity and number of sites. All but four projects proposed to be commissioned by 2030 are battery storage, with two CAES and two PHS projects also proposed.

Which energy storage projects are advancing in Canada?

In addition to BESS projects, there are also many Long Duration Energy Storage (LDES) technology-based projects advancing in Canada such as compressed air, pumped hydro and other non-lithium ion battery chemistries. About Energy Storage Canada: Energy Storage Canada is the only national voice for energy storage in Canada today.

When did energy storage start in Canada?

The first energy storage project in Canada, the Sir Adam Beck Pump Generating Station, came online in 1957. However, the next project did not come online until 2013. There are three main types of energy storage currently commercially available in Canada:
