

Industrial-grade solar container inverter

Overview

What is a commercial grade solar inverter?

These commercial grade solar inverters are for large scale commercial applications. Ranging in size from 30,000 watts to 500kW, these central inverters convert DC solar power to usable AC power efficiently and with little maintenance. The top brands.

What is a commercial solar inverter?

The commercial inverter from KOSTAL supports a system voltage of up to 1100 volts DC. In this way, the solar inverter for the commercial sector ensures reliable and constant energy yields, meaning that the rated output of the company's solar system is quickly reached and the output power continues to be utilised perfectly.

What types of inverters are available?

A wide range of inverters (solar pv and storage), tailored to suit any type of system scale: residential, commercial, industrial and utility scale.

Which solar inverter has the highest power density?

Ingeteam's solar inverter with the highest power density thanks to its 3,825 kVA of maximum AC power. MV turnkey solution up to 7.65 MVA, with all the elements integrated on a full skid, equipped with one or two INGECON SUN 3Power C Series solar inverters. Multi-MPPT string inverter up to 350 kVA with 12 MPPTs and 1,500V technology.
