

Industrial grade solar container lithium battery pack

Overview

What is the capacity of a battery pack?

Capacity range from 30 to 150kW, three phase output for middle-scale C&I use. Advanced Li-ion battery pack with high energy density and more than 20 year service life is an ideal solution for energy storage system of any capacity. Compact and scalable with modular 19" rack-mount design it can be easy to expand capacity from kWh to MWh scale.

What is advanced Li-ion battery pack?

Advanced Li-ion battery pack with high energy density and more than 20 year service life is an ideal solution for energy storage system of any capacity. Compact and scalable with modular 19" rack-mount design it can be easy to expand capacity from kWh to MWh scale. Capacity range from 150 to 500kW, three phase output for middle-scale C&I use.

Why are neosun Li-ion batteries important?

Li-ion batteries instantly respond to any changes in power and keep it within specified limits. Energy storage solutions based on Neosun Li-ion batteries increase power supply reliability and provide backup power during an emergency shutdown. They are indispensable at facilities where full autonomy is required.

How can battery storage reduce electricity bill?

The typical electricity demand curve usually doesn't meet the PV generation curve. By storing the surplus PV generation into battery storage unit, it can maximize PV generation and reduce electricity bill. Storage system will backup the load supply when grid fails.
