Overview

What is a 12V/24V double voltage inverter?

□12V/24V double voltage inverter pure sine□2024 second generation pure sine wave voltage converter converts the 12V/24V DC power of the battery into AC 220V 230V 50Hz. The rated power can be up to 2000 W and the peak power is 4000 W, with 2 EU sockets, 1 Type-C port, 2.1 A USB port, LCD display and 2 fans, conversion efficiency > 92%.

What is a Dual Inverter System?

A Dual Inverter System is a redundant and fault tolerant system that provides an optimal solution when continuous operation and long battery service life are required. It has a modular construction and fits in standard 19" racks and cabinets.

What is a pure sine wave inverter?

Pure sine wave inverter: the pure sine wave inverter produces a waveform that corresponds to that of the household current. It is characterised by high stability, low noise and excellent adaptability to different loads. This ensures less damage and a longer service life. It is suitable for a wide range of AC loads and applications.

How much power does a sine wave inverter have?

Whether it is a connection with a 12 V battery or a 24 V battery, the rated power is 2000 W, with a peak power of 4000 W. Pure sine wave inverter: the pure sine wave inverter produces a waveform that corresponds to that of the household current. It is characterised by high stability, low noise and excellent adaptability to different loads.
