

Inverter high frequency 400v

Overview

What is a 400V inverter?

The 400V inverter is the brain at the heart of the electric powertrain, it controls the electric motor. It converts Direct Current (DC) from the battery to Alternative Current (AC) to power the electric motor.

What is a high frequency inverter?

A high frequency inverter is a type of UPS (Uninterruptible Power Supply) that uses a microprocessor as its process control center. It employs software programming to control its operation, unlike traditional analog circuits.

Where can I buy a high-quality frequency inverter?

In the ST- Shop you can buy high-quality frequency inverters in the power range from 0.75kW to 1000kW. You will find different model series, which are suitable for different applications. Sourcetric offers beside the proven products also product novelties, to which you can be advised by the expert.

What features do frequency inverters have in common?

Here you can see the main features that our frequency inverters have in common: The inverters are usually suitable either for single-phase mains voltage of 230 V as well as for three-phase motor voltage of also 230 V or for three-phase mains voltage as well as motor voltage of 400 V.
