Can China scale up energy storage investments?

This study explores the challenges and opportunities of China's domestic and international roles in scaling up energy storage investments. China aims to increase its share of primary energy from renewable energy sources from 16.6% in 2021 to 25% by 2030, as outlined in the nationally determined contribution .

Are energy storage investors moving to state-owned enterprises (SOEs)?

This implies a major shift in energy storage investors to state-owned enterprises (SOEs) from power grid companies such as China Energy, Huaneng, Huadian, and State Power Investment Corporation (SPIC) .

Can energy storage solve renewable intermittency issues?

To achieve this target, energy storage is one of the most promising solutions for addressing renewable intermittency issues by balancing electricity demand and supply, which is increasingly a challenge in power systems.

What is the southern Thailand wind power and battery energy storage project?

The Southern Thailand Wind Power and Battery Energy Storage Project, funded by the Asian Development Bank (ADB) in 2020, was the first private sector initiative to support the development of 10 MW utility-scale wind power generation with an integrated 1.88 MWh BESS in Thailand.
