## Overview

---

Should UK government invest in long-duration energy storage?

UK government announces 'cap and floor' scheme with aim of incentivising investment in long-duration energy storage amid concerns that 72TWh of UK renewable power per year 'could be wasted' - but there is a lack of clarity about where to locate such storage and what type of long-duration technology works best.

How are distributed energy resources transforming the UK's energy landscape?

Distributed Energy Resources (DERs) are playing a pivotal role in revolutionizing the energy landscape of the United Kingdom. With a growing emphasis on energy efficiency and renewable power generation, DERs are driving the transition towards a more sustainable and cleaner future.

What is distributed generation & how can it benefit the UK?

"Distributed Generation through DERs offers a transformative approach to power generation, delivering a more sustainable and resilient energy landscape for the UK." By embracing DERs and distributed generation, the UK can unlock the potential for a decentralized, clean energy future.

What are distributed energy resources?

Distributed Energy Resources (DERs) refer to a range of decentralized clean energy solutions that generate and manage power at or near the point of consumption.
