

# Jakarta has solar air conditioning

## Overview

---

How much is the Indonesia air conditioning market worth?

The Indonesia Air Conditioners Market was valued at USD 1.56 Billion in 2024, and is expected to reach USD 2.44 Billion by 2030, rising at a CAGR of 7.80%. The air conditioning market in Indonesia has witnessed significant growth and transformation over recent years.

Do you need air conditioning in Jakarta?

In homes, particularly in densely populated urban areas like Jakarta, where the heat can be unbearable, AC units are seen as essential. Likewise, commercial spaces like offices, malls, and restaurants require air conditioning systems to ensure a comfortable environment for both employees and customers.

Why are air conditioners so popular in Jakarta?

The growing awareness of the health risks associated with extreme heat, such as heat exhaustion and heatstroke, also drives the adoption of air conditioners. In homes, particularly in densely populated urban areas like Jakarta, where the heat can be unbearable, AC units are seen as essential.

What are the key players in Indonesia's air conditioning market?

Key market players include Daikin, Panasonic, LG, Samsung, and Mitsubishi Electric. The Indonesian government's energy efficiency policies and sustainability incentives are shaping the future of the air conditioning industry. Discover market trends, challenges, and investment opportunities in the latest market report.
