

Jakarta s new solar panels

Overview

Will Indonesia build a 100 GW solar power plant?

Jakarta, August 7, 2025 - Indonesia will build a 100 Gigawatt (GW) Solar Power Plant (PLTS). The program plans to build 80 GW of solar power plants and 320 GWh of Battery Energy Storage System (BESS) to be managed by the Merah Putih Village Cooperative (KDMP) in 80,000 villages, and 20 GW of Centralized solar power plants.

Can solar power plants be used in Indonesia?

Indonesia possesses solar energy potential with a capacity ranging from 3,300 GW to 20,000 GW, spanning from Sabang to Merauke. With increasingly affordable, modular, and easy-to-build and operate solar power plant (PLTS) technology, this project could serve as a strategic solution to provide reliable and affordable energy access across Indonesia.

What is the biggest rooftop solar power plant in Jakarta?

“Today we celebrate an extraordinary achievement, the inauguration of the largest rooftop solar power plant in Jakarta, located right at Grand Indonesia. This project will make a major contribution to energy savings and carbon-emission reductions,” Iwan said at the Jakarta ceremony.

How much does a rooftop solar system cost in Jakarta?

For new panels, expect a cost ranging from approximately IDR 10 million to IDR 20 million per installed kilowatt peak (kWp) for a standard rooftop solar system in Jakarta. The pricing varies based on factors like the panel manufacturer and performance quality.
