

Join the home solar power generation system

Overview

How do I build a solar powered home?

Build Your Solar-Powered Home! Five basic components—Solar panels, inverters, mounting systems, specialized wiring, and monitoring equipment—are needed running a house on solar power. Success depends on your ability to appropriately size your system, estimate solar availability, determine your energy demands, and get required permissions.

How does solar power work in a residential setting?

Here's a simplified breakdown of how solar power functions in a residential setting. At its core, solar power systems for homes consist of: Depending on your location, you can: Together, these components allow your home to generate and manage its electricity, reduce reliance on fossil fuels, and lower your utility bills over time.

How does Indian government support solar installation?

The Indian government offers subsidies under schemes like MNRE (Ministry of New and Renewable Energy), reducing the upfront cost of installing a Solar Home System. States may also have individual policies supporting residential solar adoption. Initial investment varies depending on system size and type.

What is a solar home system?

A Solar Home System is an independent energy setup designed to power residential appliances using solar energy. It consists of solar panels, a battery, inverter, and charge controller. These systems are especially beneficial in areas with unreliable grid power or where homeowners wish to reduce their carbon footprint. 1. Solar Panels
