

# **Kosovo Portable Power Supply Quote**

## Overview

---

How much power does Kosovo have?

Energy Infrastructure Today, Kosovo's electricity operating capacity is about 900 MW, almost all of which comes from two antiquated coal-fired power plants, Kosovo A and Kosovo B. As the population grows, ongoing constraints on power will continue to increase.

Why does Kosovo need a reliable electricity system?

In order to boost employment, increase growth, reduce poverty, and improve people's lives, Kosovo needs affordable and reliable energy. The country's current electricity system is outdated, inadequate and undependable – posing significant challenges to economic growth and development.

Does Kosovo have a power exchange with Albania?

After the agreement between KOSTT - ENTSO-E, Kosovo made a joint with Albania and the 400 kV interconnection known as "Energy Highway" (or in Albanian "Autostrada Energjetike"), which was finished in 2016, but it was enabled in 2020, opening the way for the establishment of a joint power exchange between Kosovo and Albania.

What is the New Kosovo power plant?

The New Kosovo power plant is part of the government's plans to reform Kosovo's energy sector. Other plans include closing Kosovo A power station by 2017, rehabilitating Kosovo B power station to meet EU standards, and privatizing the country's electricity distribution system. Plans for New Kosovo also include a lignite coal mine, the Sibovc SW.
