

# Kuwait energy storage exports

## Overview

---

Why is Kuwait reliant on fossil fuels?

Kuwait is wholly reliant on fossil fuels for energy generation and by 2030, its energy demand will triple. In order to diversify its energy mix, the country targets to increase the share of renewable generation to 15% by 2030.

What is the Energy Resources profile of Kuwait?

This article assesses the energy resources profile of Kuwait in order to reveal the potential base and level of utilization of resources. The analysis of the energy profile indicates that, in 2009, Kuwait had proven crude oil reserves of 104 billion barrels and 63 trillion cubic feet of natural gas reserves.

What does Kuwait Energy do?

Kuwait Energy has a high quality and diverse portfolio of oil and gas assets and is focused on exploration, production and development of oil and gas reserves in the MENA and Eurasia regions.

What is the role of energy transformation in Kuwait?

How is energy used in Kuwait?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.
