

# **LG battery energy storage project halted due to module overheating**

## Overview

---

What happens if a LG ESS home battery overheats?

Affected Battery may overheat and catch on fire, which can result severe property damage or serious injuries. LG ESS Home Batteries are installed as part of a residential energy solar system which allows owners to capture and store energy from solar panels.

Why did LG stop manufacturing ESS batteries?

LG Energy Solution has halted the construction of its energy storage system (ESS) battery production line at its Arizona plant in the United States. Seven months ago, the company broke ground on this project in response to a stagnating electric vehicle market.

What happened to LG Energy Solution?

On June 28, LG Energy Solution stated that it is efficiently and flexibly adjusting its planned investments according to market conditions and focusing on optimizing its operations. The company announced that the construction of the Arizona ESS battery facility has been temporarily suspended.

How do I know if my LG ESS home batteries are faulty?

LG ESS Home Batteries are installed as part of a residential energy solar system which allows owners to capture and store energy from solar panels. You should urgently check your home batteries serial number via our Serial Number Checker to know whether your product is affected.

## LG battery energy storage project halted due to module overheating
