

# Large Capacity Mobile Energy Storage Containers for Ships

## Overview

---

What is containerized energy storage?

ABB's containerized energy storage solution is a complete, self-contained battery solution for a large-scale marine energy storage. The batteries and all control, interface, and auxiliary equipment are delivered in a single shipping container for simple installation on board any vessel. How does containerized energy storage work?

.

What is a containerized battery storage system?

The containerized solution provides a safe, compact, and space-efficient solution for housing batteries on board a ship, either on the deck or below deck. Multiple containers can be combined to create larger energy storage capacities, providing scalability based on the ship's energy requirements.

How does a maritime energy storage system work?

The maritime energy storage system stores energy when demand is low, and delivers it back when demand increases, enhancing the performance of the vessel's power plant. The flow of energy is controlled by ABB's dynamic Energy Storage Control System.

What is a complete energy storage system (ESS)?

The complete energy storage system (ESS) comes with battery, battery monitoring system (BMS), HVAC, TR exhaust, and firefighting and detection system. The "plug and play battery room" simplifies integration into any system integrator's power management system on board a ship.
