

Lead Acid Battery 12 Volt Inverter

Overview

Do you need a lead-acid battery for an inverter?

While lead-acid batteries are commonly used in cars, you need a lead-acid battery specifically designed for use with inverters to power your microwave, fridge, and other appliances. Inverters provide small amounts of power over a long time and only inverter batteries provide the AC current needed to power your appliances when you are off-grid.

Are acid-lead batteries still commonly used?

Although acid-lead batteries are being replaced by newer lithium battery technology due to disposal issues, acid-lead batteries are still the most popular batteries for inverter use.

Are lead-acid batteries toxic?

Lead-acid batteries contain toxic materials (lead and sulfuric acid) that can cause serious harm if leaked or mishandled. Sulfuric acid: The primary electrolyte in lead-acid batteries is sulfuric acid, a highly corrosive substance that can cause severe burns if it comes into contact with skin or eyes.

Which battery is best for an RV inverter?

For RVs or off-grid homes, the Renogy 12-V deep cycle inverter battery is one of the best acid-lead batteries for inverter use. It can power your RV's appliances and even help restart your RV engine.
