

Lead-acid UPS battery cabinet

Overview

Do data centers use lead-acid batteries?

Historically, most data centers depend on lead-acid batteries to power their UPS systems.

What is a battery cabinet / rack?

EverExceed designs customized battery cabinets / racks for individual batteries. The cabinet or racking system can be specified to accommodate any battery cell. From flooded to sealed, from lead acid to nickel cadmium and from vertical to horizontal all kinds of battery cabinet / rack can be designed flexibly to save the space in battery room.

Are nickel-zinc batteries better than lead-acid batteries?

However, UPS systems that utilize nickel-zinc (NiZn) battery technology have specific advantages over lead-acid in terms of performance, reliability, safety, lifetime cost and climate impact. Despite these advantages of alternative battery chemistries, most existing UPS systems were already designed to work with lead-acid batteries.

What is a zinc five battery cabinet?

ZincFive's BC Series Battery Cabinets, while housing NiZn batteries with all of their associated benefits, adapt the lead-acid charging system to the needs of the nickel-zinc battery. The battery cabinets' intelligent charging & monitoring system emulates the profile of lead-acid batteries to the UPS.
