

# Lead-acid battery cabinet inside

## Overview

---

What is a battery cabinet / rack?

EverExceed designs customized battery cabinets / racks for individual batteries. The cabinet or racking system can be specified to accommodate any battery cell. From flooded to sealed, from lead acid to nickel cadmium and from vertical to horizontal all kinds of battery cabinet / rack can be designed flexibly to save the space in battery room.

How to install a battery storage cabinet?

Mounting mechanism - they vary depending on whether the battery storage cabinet is a pole mount, wall mount, or floor mount. The mechanism allows you to install the battery box enclosure appropriately. Racks - these systems support batteries in the enclosure. Ideally, the battery rack should be strong.

What should a battery cabinet have?

Insulation system - insulation is also a safety measure a battery cabinet should have. Grille - it allows for free air flow thereby ensuring efficient cooling. Dual-stage venting system - It is a common technology in electric vehicle battery systems. The first stage will prevent water ingress and equalize pressure.

What are the parts of a battery storage cabinet?

Let's look at the most common parts: Frame - it forms the outer structure. In most cases, you will mount or weld various panels on the structure. The battery storage cabinet may have top, bottom, and side panels. Door - allows you to access the battery box enclosure. You can use hinges to attach the door to the enclosure structure.
