

Libya household solar lights

Overview

Does Libya have solar energy?

Libya has a great potential for solar energy. In the coastal regions, the daily average of solar radiation on a horizontal plane accounts to 7.1 kWh/m²/day whilst the radiation is 8.1 kWh/m²/day in the southern region. The average sun duration is of more than 3,500 hours per year.

What type of electricity is used in Libya?

Renewable electricity here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal power. Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Libya: How much of the country's electricity comes from nuclear power?

.

How many solar systems are installed in Libya?

By 2006, the total number of remote systems installed by General Electric company of Libya (GECOL) was 340. They had a total capacity of 220 kWp. The Center of Solar Energy Studies (CSES) and the Saharan Center also installed 150 with a total power of 125 KWp.
