

Lifepo4 power station factory in Cambodia

Overview

What is a LiFePO4 power station?

A LiFePO4 power station is a type of portable power station that uses lithium iron phosphate (LiFePO4) batteries. These power stations are ideal for certain environments, particularly hot areas, due to their stable chemistry. The most popular brand using LiFePO4 batteries is Bluetti.

How much money does Cambodia need to build a power plant?

The Cambodian government has stated in its PDP that it will need \$9 billion of investment to develop new power plants and expand the national grid, of which \$2.5 billion has been approved between 2022 and 2025. Opportunities exist for power generation and transmission equipment.

What are the main sources of electricity in Cambodia?

Major sources of local power generation are hydro and coal, and minor sources include diesel, wood, and biomass. In addition to local power generation, Cambodia also buys electricity from neighboring countries, especially during the dry season.

What is Cambodia's power development master plan 2022-2040?

In its Power Development Master Plan (PDP) 2022-2040, Cambodia announced that there would no more investment of coal power plants after 2024, and renewable energy (domestic and imported) would play a significant role towards Cambodia's transition to clean energy.
