

Lithium-ion solar container battery life in Bucharest

Overview

What is the largest energy battery storage capacity in Romania?

CONSTANTA, Romania, April 9, 2024 /PRNewswire/ -- Monsson has commissioned the largest energy battery storage capacity in Romania. The capacity is part of the first hybrid photovoltaic-wind-battery project, installed at the existing operational 50 MW project.

What is monsson - the largest energy battery storage capacity in Romania?

MONSSON connected to the National Grid - the largest Energy Battery Storage capacity in Romania, a 95% Romanian project, made with own funds (PRNewsfoto/MONSSON) The event brought together representatives from the authorities and business environment as well as specialists in the energy field.

Who makes lithium ion batteries?

The Lithium Ion batteries are locally produced by the Romanian company Prime Batteries Technology. The storage unit is charged with energy produced by the Wind Farm, by the 35 MW PV project under construction, named Gălbiori 2, which will be grid connected end of 2024 and from the national grid when there is no wind or sun.
