<b>DATE MANUFACTURED</b>	12/2024		
<b>IDENTIFICATION NO.</b>	YJ24-1217		

## Overview

---

How much does a commercial battery energy storage system cost?

**Average Installed Cost per kWh in 2025** In today's market, the installed cost of a commercial lithium battery energy storage system — including the battery pack, Battery Management System (BMS), Power Conversion System (PCS), and installation — typically ranges from: \$280 to \$580 per kWh for small to medium-sized commercial projects.

How much does battery storage cost in 2025?

Battery storage prices have gone down a lot since 2010. In 2025, they are about \$200–\$400 per kWh. This is because of new lithium battery chemistries. Different places have different energy storage costs. China's average is \$101 per kWh. The US average is \$236 per kWh. Knowing the price of energy storage systems helps people plan for steady power.

How much does energy storage cost?

Different places have different energy storage costs. China's average is \$101 per kWh. The US average is \$236 per kWh. Knowing the price of energy storage systems helps people plan for steady power. It also helps them handle money risks. As prices drop and technology gets better, people need to know what causes these changes.

How much does a battery cost?

Most households are likely to benefit from a battery with a decent amount of capacity, about 10kWh or more. But a smaller battery can be sufficient for small households with low energy usage. As an example, one of the most popular batteries is the 13.5kWh Tesla Powerwall 3. This currently costs about \$11,000 installed after the federal rebate.
