

Maldives solar container outdoor power BESS

Overview

Why solar PV with storage in Maldives?

Solar PV with storage has proven suitable and competitive for Maldives' high penetration of renewable energy (POISED type B projects), with an average fuel savings of 25%. The concept design of hybrid systems (efficient diesel generators + solar PV plants + energy storage) has resulted in success for Maldives.

What is arise Maldives?

Under the Accelerating Renewable Energy Integration and Sustainable Energy (ARISE) project, supported by the World Bank, Maldives is seeking contractors for installation of 40 MWh capacity Battery Energy Storage Systems (BESS), across 18 electricity grids representing 19 islands/cities.

How can the Maldives achieve “carbon neutrality” by 2030?

While ASPIRE project addresses the need to increase PV generation in Maldives through private sector investment, Maldives envisions an ambitious goal of “carbon neutrality by 2030” along with an immediate target for 2023 to increase the share of renewable energy by 20% compared to 2018 levels.

What are the benefits of Bess installations?

The BESS installations will support high renewable energy penetration for the island grids and ensure efficient operation of existing diesel generators needed in a solar PV/Diesel hybrid generation mix.
