

Mali solar power station energy storage investment

Overview

Is Mali a good place to invest in solar power?

The analysis reveals that a significant portion of Mali's land area is well suited to solar PV (398.7 GW) and onshore wind (1.25 GW) development, with priority zones identified along existing and planned transmission lines and road networks.

How a decentralized energy supply works in Mali?

The small size and dispersed locations of villages in Mali for a long time made off-grid decentralized mechanical and electric energy supply the only viable option. A multifunctional platform consists of a 10-hp diesel engine that, as desired, can power a mill, a generator, a pump or other devices mounted on the same rail.

What is the energy strategy of Mali?

The general energy strategy of Mali focuses on the development of local resources such as hydropower and solar energy in order to reduce petroleum imports. Objectives of the National Energy Policy regarding renewable energy are: Promotion of RE.

Are there favourable zones for utility-scale solar and wind projects in Mali?

IRENA (2024), Investment opportunities for utility-scale solar and wind areas: Mali, International Renewable Energy Agency, Abu Dhabi. This report summarises IRENA analysis to identify favourable zones in Mali for utility-scale solar PV and onshore wind projects, and their associated techno-economic parameters.
