

Market Price of 15MWh Solar Container for Wastewater Treatment Plants

Overview

The number of wastewater treatment plants (WWTPs) in China is fast growing as the country's urbanization accelerates. WWTPs, part of the high-energy-consumption industry, must use a lot of energy i.

Are wastewater treatment plants using solar energy?

With rising energy costs and the worsening climate crisis, some wastewater treatment plants have started using solar energy. Because solar adoption at wastewater treatment plants is still relatively new, there is little known about these facilities, including where they are, what drove them to choose solar, and if solar has been a success.

What is the PV potential of a wastewater treatment plant (WWTP)?

The PV potential of a WWTP is correlated with its planned wastewater treatment capacity. The number of wastewater treatment plants (WWTPs) in China is fast growing as the country's urbanization accelerates. WWTPs, part of the high-energy-consumption industry, must use a lot of energy in wastewater treatment.

Can a municipality install a solar system on a wastewater treatment facility?

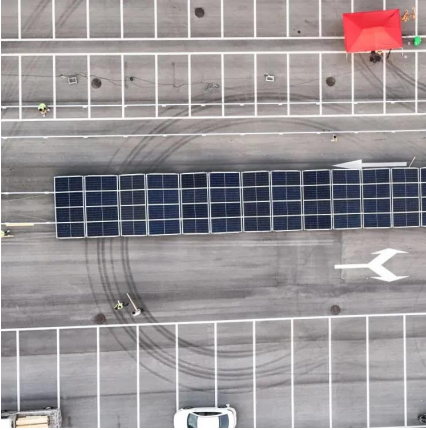

So in some cases, wastewater treatment facilities are— the municipalities are installing the solar on site and directly consuming that electricity. And many other scenarios, the municipality is entering what's called a power purchase agreement with a solar developer.

Do WWTPs use a lot of energy in wastewater treatment?

WWTPs, part of the high-energy-consumption industry, must use a lot of energy in wastewater treatment. PV projects in WWTPs are viable solutions for energy conservation, but PV project investors, WWTP owners, and government authorities need to conduct rigorous economic and ecological assessments.
