

# **Morocco Casablanca environmentally friendly solar glass research and development**

## Overview

---

Can solar and wind energy make Morocco a green economy?

Researchers in Morocco are studying ways to use solar and wind energy for a faster transition to a green economy. This documentary tells the story of Morocco's quest to produce clean, renewable energy. If playback doesn't begin shortly, try restarting your device.

Will Morocco become a center for green industrial energy production?

With a favorable environment for climate-friendly investment, Morocco will likely soon become a center for green industrial energy production. This comes following decades of high energy dependence on external energy sources, which even in 2022 accounted for 90 percent of Morocco's energy needs.

Will Morocco reach 52 % renewable power capacity by 2030?

With the goal of reaching 52 % of installed power capacity from renewables by 2030, the Moroccan Ministry of Energy, Mines, and Environment, along with the Moroccan Agency for Sustainable Energy, have emphasized the nation's commitment to developing green energy systems.

Why is Morocco building a new renewable power mega-project?

The \$5.6 billion construction effort will help Morocco meet its 2030 target of renewables comprising 52% of its power generation capacity. Beyond these projects, the development of newer renewable power mega-projects is being directly driven by the needs of Morocco's green energy ecosystem and international renewable energy supply chains.
