

Moscow Hospital Uses 15kW Folding Container

Overview

What is a small shipping container clinic?

These small shipping container clinics solve that problem because they are housed inside portable shipping containers and provide disaster relief to those in need. The mobility of these makeshift clinics allows medical services to reach areas that otherwise have no medical resources.

What is a mobile shipping container clinic?

Mobile shipping containers are pre-designed and pre-built. Instead of waiting months for a new traditional facility to be built, shipping container clinics can be set up in just a couple of days.

Are modified shipping containers a good choice for medical facilities?

Shipping containers with built-in electrical and plumbing, stainless steel fittings for hygiene, modified shipping containers are an excellent way to get a fully equipped, prefabricated medical facility into the field fast. From a medical clinic for “outpatient treatments” to a facility to perform surgeries, shipping containers can be invaluable.

Can a dental clinic use a shipping container?

While using a dental van is one popular solution, other medical centers use shipping containers as a more cost-effective solution. A modified shipping container can be easily transformed into mobile dental clinics. With an experienced contractor, these containers can be customized.
