

Myanmar New Energy Storage Power Station Project

Overview

Is MEPE building a power station in Myanmar?

MEPE is expected to begin work soon on building a 33-MW power station in Myanmar. The project will have one gas-powered turbine and another that uses steam. Most of the project funding is to be provided by the Japanese government.

How will Myanmar's new hydropower station work?

The new hydropower station in Myanmar is a run-of-river type, which involves no resettlement, little land inundation, and environmental impact. It has an installed capacity of 600 MW, with an actual power supply of 174.8 MW and an annual power output of 4,033 GWh. The electricity will be transmitted to both Myanmar and China through 230 kV and 220 kV cables.

How much electricity does Myanmar get from power stations?

Under all the joint-venture agreements, Myanmar is entitled to get 10 to 15 percent of the annual electricity generation from the power stations free of charge.

How much electricity does the kyeeonkeewa photovoltaic power station generate?

POWERCHINA construction workers celebrate the grid-connected power generation of the Kyeeonkeewa Photovoltaic Power Station in Myanmar. Located in Magway Province, Myanmar and with a total installed capacity of 40.28 MWp, the power station is projected to generate 64.64 million kWh of electricity for the grid on average per year.
