

Nantarawa Mobile Energy Storage Container Fast Charging

Overview

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO₄) combined with an intelligent 3-level battery management system (BMS);.

What is energy storage system?

Energy Storage System is the upgrade that every charging station needs that will benefit not only the car owners and station owners, but the community as a whole. For EV-Charging Stations, Demand Charge is one of the reasons that makes up significant portion of cost. Demand Charge. Enables Rapid Charging (200 kW)
