

Netherlands Hydrogen Energy Station 372KWh

Overview

Why should the Dutch government adopt green hydrogen for energy storage?

To facilitate this objective, one of the key pillars for the Dutch government is the adoption of green hydrogen for energy storage—also as part of the broader European strategy to enhance energy security and decarbonize industry. Already today, the Dutch industry produces and uses hydrogen on a large scale.

Can green hydrogen be produced in the Northern Netherlands?

The consortium of RWE, Shell, Equinor and Eneco has demonstrated that large-scale production of green hydrogen is feasible in the Northern Netherlands and will now start preparations for the project's next phase. Why this project?

.

How will the government support sustainable hydrogen in the Netherlands?

The cabinet of Netherlands is providing more than €700 million in subsidies to companies that will produce sustainable hydrogen in the Netherlands. With this, the cabinet will accelerate the development of sustainable hydrogen in the Netherlands.

Will Gasunie develop the hydrogen network in the Netherlands?

Gasunie will develop the hydrogen network in the Netherlands in the coming years, after which it will assume the role of TSO (Transmission System Operator). The vast majority of the national transport network for hydrogen will consist of pipelines that were previously used for natural gas transport.
