

New base station for Yemen communications

Overview

The internationally recognized Yemeni government officially launched SpaceX's Starlink satellite internet service in Aden on Tuesday, August 5, establishing authorized sales points for devices and subscription packages under the direct supervision of the Public Telecommunications Corporation. Is Yemen lagging behind in the development of telecommunications?

Compared to the United States, Yemen is massively lagging behind in the development of telecommunications. Under the country code +967, there were a total of 20.73 million connections in 2023. Among them were 20.00 million mobile phones, which corresponds to an average of 0.51 per person. In the US, this figure is 1.2 mobile phones per person.

How many mobile phones are there in Yemen?

Among them were 20.00 million mobile phones, which corresponds to an average of 0.51 per person. In the US, this figure is 1.2 mobile phones per person. Back to overview: Yemen With an average download speed of 9.7 Mbit/second for fixed-network broadband internet, Yemen ranks 148th in an international comparison.

Is there a 5G network in Yemen?

There is not yet a modern 5G network in Yemen (as of 2023). The penetration of 4G, i.e. mobile communications with at least LTE speed, recently stood at 56.70%. Conversely, 17.06 million people in the country had to make do with the maximum Internet speed of the outdated UMTS standard (or even less).

How many people in Yemen have a broadband connection?

Values above 100 percent mean that, on average, every inhabitant has more than one connection. Yemen is lagging behind in the expansion of broadband internet connections. Around 18 percent of all residents have access to the internet.
