

New energy storage power supply service in Cebu Philippines

Overview

Where is EAUC located in Cebu?

The East Asia Utilities Corporation (EAUC) facility at the Mactan Economic Zone in Lapu-Lapu City, Cebu. This site is set to host a hybrid Battery Energy Storage System (BESS), poised to help deliver more stable power to the Visayas grid.

What is a hybrid energy storage system in Central Visayas?

Considered one of the first large-scale energy storage systems in Central Visayas, the hybrid BESS will provide ancillary services by storing surplus electricity and releasing it to the grid when needed to help stabilize power supply.

How will a large-scale energy storage system benefit Central Visayas?

Targeted for commissioning by the first half of 2026, the project will be one of the first large-scale energy storage systems in Central Visayas. It is expected to help improve the reliability of the power supply amid rising demand from industries, businesses, and new locators within the economic zone.

Why is energy storage important in the Philippines?

The Department of Energy projects that the share of variable renewable energy such as solar and wind capacities will rise to 16–28% in the Philippines by 2031. In this context, energy storage will be critical for managing fluctuations and enabling even higher levels of variable renewable energy integration.
