

Niger home UPS uninterruptible power supply manufacturer

Overview

What is uninterruptible power supply?

Uninterruptible Power Supply protects your electricals from the adverse effects of brownouts, spikes and power outages. An uninterruptible power source or uninterruptible power supply is a power supply system responsible for providing emergency load in case of power failures.

What is alternative power solutions in the East African region?

Our aspiration is to provide alternative power solutions in the East African Region. We provide unique specialized services tailored to meet the requirements of the region in terms of Solar, Wind Powered Equipment, Uninterruptible Power Supply (UPS) as well as Power Backup Systems.

What is a ups power supply & how does it work?

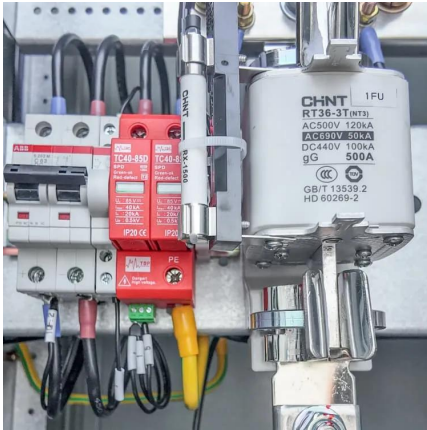

Our UPS power supply provides protection from power surges, load shedding and unpredictable weather conditions. Uninterruptible Power Supply (UPS) ensures its internal battery gets constantly charged from the main electrical grid supply and delivers a steady, consistent electricity flow to any equipment or appliance plugged into it.

Why should you choose a Rackable UPS system?

From Oil & Gas platforms to industrial site and nuclear power stations as well as for Server rooms or data centres, healthcare sectors etc you will find in our range of rackable, stand-alone or modular UPS System, that protect your power supply, ensures your business continuity and protect your investments.
