

Nordic solar container lithium battery energy storage equipment company

Overview

What does Nordic batteries do?

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems. At Nordic Batteries we focus on what is important: safety, reliability and performance.

Are Nordic batteries looking for a development engineer?

Nordic Batteries are seeking a development engineer for mechanical construction and system design. Factor 47 is operative! The pilot line where Nordic Batteries will produce their first battery modules is now officially open after the visit from former Prime Minister Erna Solberg where she cut the banner to kick it off.

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.

What is industrial microgrid energy storage?

Industrial Microgrid Energy Storage - Increasing Self-Sufficiency and Reliability
Industrial microgrids function as independent mini power generation and distribution systems capable of self-sufficiency. C&I ESS stabilizes intermittent renewable sources, ensuring stable microgrid operation.
