## Overview

---

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

Can solar off-grid cold storage be used for small businesses?

This research presents technologies that provide solar off-grid cold storage to houses, health centers, retail shops (off-grid refrigerators), and small farms or street markets (off-grid cold rooms).

How does a solar off-grid cold storage room work?

Evaporator - removes undesirable heat from the surrounding goods by circulating the low-temperature coolant in this heat exchanger under low pressure. Modern solar off-grid cold storage room systems have embedded automation to monitor and control the entire system, ensuring its correct working process.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.
