

# North America Energy Storage New Energy Lithium Batteries

## Overview

---

How big is the North America lithium-ion battery market?

North America lithium-ion battery market from the NMC segment is anticipated to exceed USD 9 billion by 2032 owing to high energy density, improved stability, and longer lifespan compared to other product variants. North America Lithium-Ion Battery Market Scope.

Why are lithium-ion batteries becoming more popular in North America?

The escalating shift towards renewable energy sources necessitates efficient energy storage solutions, with lithium-ion batteries being at the forefront due to their high energy density and longer lifespan. This dual demand is stimulating the production and deployment of Lithium-Ion Battery across North America.

Who makes lithium ion batteries in North America?

The North America lithium-ion battery industry consists of prominent companies such as Tesla, Exide Technologies, General Electric, BYD Company Ltd., A123 Systems, LLC, Toshiba Corporation, Samsung SDI Co., Ltd., Panasonic Corporation, LG Chem, Duracell, Inc., Hitachi Energy Ltd., and Koninklijke Philips N.V, among others.

How much is the US lithium-ion battery market worth?

U.S. lithium-ion battery market valuation is projected to surpass USD 74 billion by 2032 owing to ongoing advancements in battery technology, and significant investments in domestic battery manufacturing infrastructure.

## North America Energy Storage New Energy Lithium Batteries
