

Off-grid energy storage power generation at Lagos Power Plant in Nigeria

Overview

Does Lagos' off-grid electricity surpass Nigeria's national grid?

Lagos' off-grid electricity surpasses Nigeria's national grid, reveals a new report. This energy crisis raises concerns about Africa's future electricity access.

How big is Nigeria's off-grid generation capacity?

“Recent spatial data studies by SEforALL suggest that off-grid generation capacity in Lagos State alone could exceed 19GW, surpassing Nigeria’s entire grid-connected generation capacity.

Is Nigeria's Energy Access Crisis a problem?

Off-grid and self-generated electricity in Lagos State has surpassed Nigeria’s entire grid-connected capacity, a new report by the Africa Finance Corporation has revealed, raising concerns over the growing energy access crisis in the country.

Which countries are generating more electricity outside the grid?

The report read, “A growing share of generation is now occurring outside the grid, through off-grid, embedded and captive power systems, particularly in Africa’s largest economies, Nigeria and South Africa.
