

Off-grid type Monaco mobile energy storage container for power grid distribution substations

Overview

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO₄) combined with an intelligent 3-level battery management system (BMS);.

How can a microgrid be used in a construction site?

Solar, storage and diesel generator combined microgrid used in areas without electricity. Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply.

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.

What is a mobile power station?

The MOBIPOWER is the silent solution for your remote power needs at construction job sites, off-grid camps, or other applications. Whereas, diesel generators require with fuel and are noisy, this mobile power station uses solar energy with no noise pollution.
