

# **Paramaribo AC Uninterruptible Power Supply**

## Overview

---

What is an uninterruptible power supply (UPS) system?

Used across a wide range of applications and industries, Uninterruptible Power Supply (UPS) Systems are designed to provide a continuous source of input power despite mains failure, electrical surges and power interruptions.

How do I Choose an uninterruptible power supply for DC applications?

Our uninterruptible power supplies for DC applications provide reliable protection against supply interruptions. Select the appropriate DC UPS for your application. Our uninterruptible power supplies for AC applications provide a pure sine curve at the output. Select the ideal AC UPS and ensure superior system availability.

Why should you choose Phoenix Contact uninterruptible power supplies?

Ensure superior system availability with our power supply systems. Find out about power supplies, DC/DC converters, redundancy modules, and uninterruptible power supplies for various requirements and industries. Phoenix Contact uninterruptible power supplies for AC and DC applications provide reliable protection against supply interruptions.

How to choose a power supply for a DC application?

Select the appropriate power supply, uninterruptible power supply, and battery module for your application. Furthermore, our UPS modules with integrated power supply or integrated battery module offer a space-saving UPS solution. Our uninterruptible power supplies for DC applications provide reliable protection against supply interruptions.
