

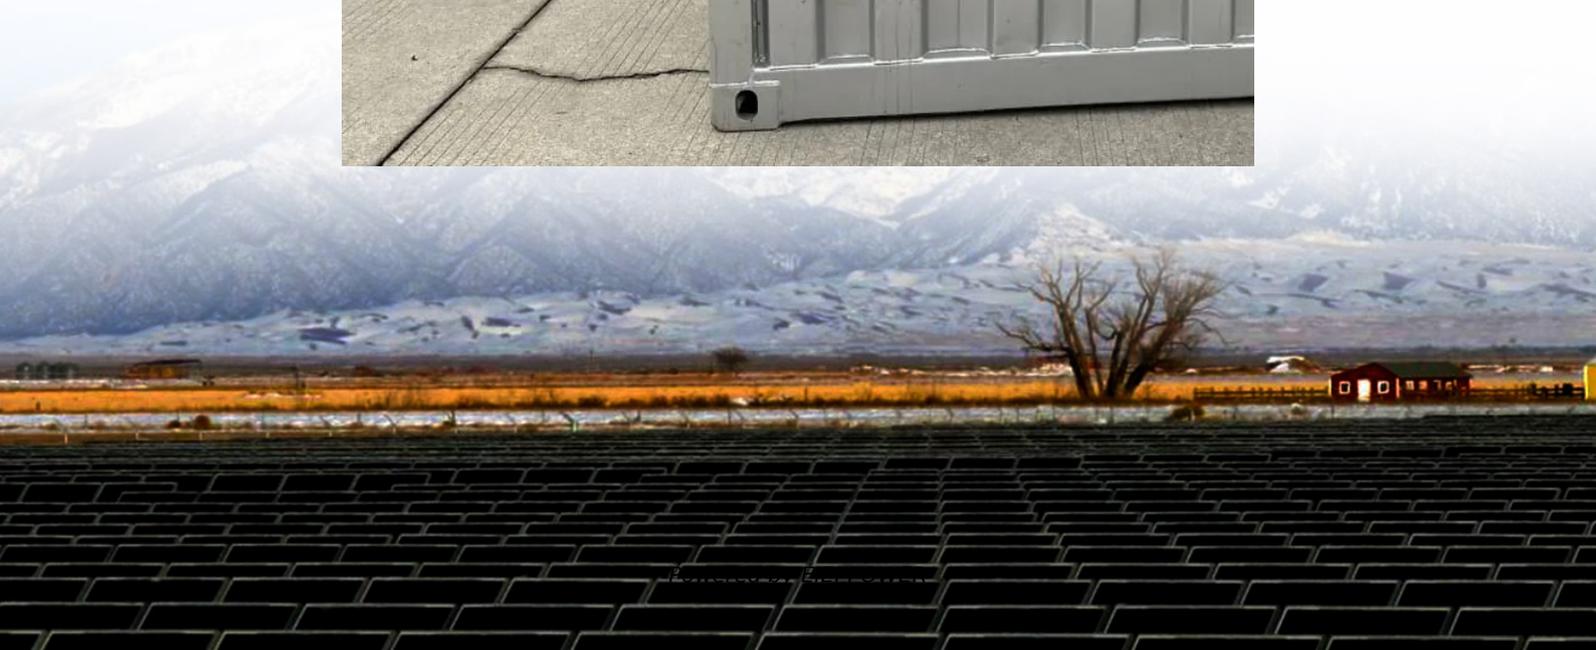

Photovoltaic Energy Storage Container Two-Way Charging Manufacturer

Overview

What is a mobile solar PV container?

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and commercial applications. Fast deployment in all climates.

How a photovoltaic power storage system works?

By stores photovoltaic power in batteries directly and discharges it to the load at night, It has pretty of advantages in solving the consumption problem, including smoothing the load for users and reducing electricity costs. This solution uses 5 sets of modular outdoor cabinet energy storage system, which supports up to 15 units in parallel.

What is photovoltaic & energy storage & EV charging mode?

This solution is designed to meet the development needs of renewable energy and new energy vehicles, that is, photovoltaic + energy storage + EV charging mode, using photovoltaic power generation to provide green and clean electricity for power stations and car owners.

What is HJ mobile solar container?

The HJ Mobile Solar Container comprises a wide range of portable containerized solar power systems with highly efficient folding solar modules, advanced lithium battery storage, and smart energy management.
