

Plant solar tiles

Overview

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

What is a solar roof tile?

The solar roof tile – for a modern roof that protects, generates electricity and impresses with its simple elegance. Meyer Burger Tile combines high-quality aesthetics with innovative solar energy. Invisibly integrated, the technology remains concealed while the roof shines in perfect beauty.

How do solar tiles work?

Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof. Photovoltaic cells in solar tiles turn sunlight into direct current (DC) energy.

Are solar tiles a good investment?

Solar tiles perfectly combine architecture, aesthetics and photovoltaic technology, making the entire roof look beautiful and elegant, with a strong sense of technology, and enhancing the value of the property itself.
