

Podgorica Farm uses 40-foot folding shipping container

Overview

What is container farming?

In the decade since then, container farming has evolved into an important subset of the indoor agriculture industry. Used or purpose-built 40-foot containers are used as shells to house hydroponic farms which can be set up vertically or horizontally. The containers are climate controlled and use indoor growing lights to replicate the sun.

What are 40 ft containers used for?

Used or purpose-built 40-foot containers are used as shells to house hydroponic farms which can be set up vertically or horizontally. The containers are climate controlled and use indoor growing lights to replicate the sun. Learn more about container farming [The Advantages of Container Farming](#).

What is a container vertical farm?

Container vertical farms utilize modified shipping containers equipped with all the necessary systems for plant growth, including lighting, climate control, and hydroponic or aeroponic systems.

How many shipping containers can a farmer operate?

One farmer can comfortably operate up to three shipping containers. The modular and stackable design of these farms conserves space and can be placed almost anywhere, making it easier to scale a vertical farming business compared to traditional methods.
