

Poland solar Container Agriculture

Overview

What is agrivoltaics in Poland?

Agrivoltaics is the simultaneous use of land for agricultural production and electricity generation. It is much more than a new pathway for the solar sector; it is an innovative form of investment that is gaining popularity in Europe and around the world. In Poland, AgriPV projects are not yet known and little knowledge is available.

Can agrivoltaics be taxed in Poland?

Taxation of PV installations coexisting with agricultural production Agrivoltaics is a new solution, unknown to the Polish tax law, combining agricultural production with generation of electricity from PV panels at the same site. Currently, there are no tax and legal regulations dedicated to AgriPV and taking into account its specific features.

Will solar power be a good investment in Poland in 2025?

Thanks to additional government subsidies for small private PV systems and high electricity prices of over 30 eurocents per kilowatt hour for companies, investments in own electricity generation in both areas will become attractive in 2025. In September 2024 alone, PV systems with a total power of 363.53 megawatts were installed in Poland.

When will Poland reach a 20 gigaWatt photovoltaic capacity?

Share of renewables in the energy mix in Poland from 1965 until 2023. Poland will reach an installed photovoltaic capacity of 20 gigawatts by the end of this year.
