

Portable mobile power digital display

Overview

What are portable display panels?

The Portable Display Panels bring together a display board and portable room divider, all in one! Designed as a lightweight, portable screen which can be moved to different areas through out a room or area.

What are portable battery-powered digital signs?

Unlike traditional fixed signage, portable battery-powered digital signs can be easily moved to different locations without the need for a constant power source or complex installation. This makes them ideal for events, pop-up shops, or areas with limited infrastructure.

How long does a battery-powered display last?

RIGHT PLACE. REAL TIME. For over a decade, Design Science has advanced battery-powered display technology, driving large-format, interactive digital signage without the limits of power cords. Our displays run 12+ hours on a single charge, delivering dynamic, real-time content exactly where it matters.

Why should you use a digital display?

Digital displays also support dynamic content like videos or animations, capturing attention more effectively than static signs. Don't compromise! Guide, direct, educate and inform where it's needed in front of your client's eyes - not where there's power available.
