

Portugal Porto new energy battery pack

Overview

Will CALB make EV batteries in Portugal?

The company will build cells and ready-to-install packs there. According to Reuters, CALB wants to produce lithium batteries in Portugal with a total annual capacity of 15 gigawatt hours, corresponding to around 187,000 batteries for electric vehicles per year. The batteries will be manufactured “mainly [for EVs] in the European market.”.

Is Portugal ready for power outages?

The announcement was made by Portugal’s Minister for Environment and Energy, Maria da Graça Carvalho, who said the country is now better prepared for potential power outages, though “hopefully they won’t happen,” and expects to see clear improvements in the national grid over the next three years.

How will Portugal improve grid resilience after April blackout?

Government outlines €400 million plan to strengthen grid resilience after April blackout. Portugal will launch a competitive tender for 750 MVA of battery energy storage before January 2026, as part of a broader €400 million package aimed at improving grid reliability and preventing future blackouts.

How many electric vehicles can a Portuguese plant power?

The first phase of the Portuguese plant has an annual capacity of 15 GWh, enough to power approximately 300,000 electric vehicles (EVs), assuming each vehicle carries a 50 kWh battery pack, the report noted.
