

Price of mobile power storage vehicle in Hamburg Germany

Overview

What happened to battery energy storage systems in Germany?

Small-scale lithium-ion residential battery systems in the German market suggest that between 2014 and 2020, battery energy storage systems (BESS) prices fell by 71%, to USD 776/kWh.

What is mobile energy storage?

Mobile energy is based on mobile distributed generation technology. Energy can be stored, controlled, communicated, and hence is mobile. In addition, the further miniaturization and decentralization of power generation distribution, along with all-weather, high-efficiency supply is proliferating the growth of the mobile energy storage market.

Does mobile energy storage reduce energy costs?

Other factors such as the aging electricity grid infrastructure and the rise in use of smart grid services are contributing to the overall growth of the global mobile energy storage market. However, lack of awareness about the utility of mobile energy storage systems in the reduction of energy costs is acting as one of the major market restraints.
