## Overview

---

How much does a Bess container cost in 2024?

The average 2024 price of a BESS 20-foot DC container in the US is expected to come down to US\$148/kWh, down from US\$180/kWh last year, a similar fall to that seen in 2023, as reported by Energy-Storage.news, when CEA launched a new quarterly BESS pricing monitor.

Why are energy storage costs so high - irrational?

Within energy storage, fears of critical raw material shortages in the face of soaring EV demand (with growth rates of 60%) led to “irrational buying behaviour”, Shreve said, leading to a 270% increase in lithium carbonate costs from Q3 2021 to Q4 2022.

What is the energy storage Grand Challenge?

The U.S. Department of Energy’s (DOE) Energy Storage Grand Challenge is a comprehensive program that seeks to accelerate the development, commercialization, and utilization of next-generation energy storage technologies.
