

# **Prices of high-rise solar panels in Southern Europe**

## Overview

---

How has the price of solar PV modules changed over the past decade?

The price of solar PV modules has decreased significantly over the past decade, with the cost of solar power falling below grid parity in many parts of Europe, thereby increasing market competitiveness, as both established and new players compete for market share.

What is the growth rate of Europe solar PV market?

The Europe solar PV market was valued at USD 63.1 billion in 2024 and is expected to reach around 127.3 billion by 2034, growing at 7.1% CAGR through 2034. What will be the growth of off grid segment in the Europe solar PV industry?

The off grid segment is anticipated to register more than 9.5% CAGR through 2034.

What is Europe solar PV market based on?

Based on mounting, the Europe Solar PV market is bifurcated into ground mounted and rooftop. The ground mounted segment is anticipated to grow more than 7% CAGR through 2034 due to improvements in technology pertaining to solar panels which increased their efficiency and durability, making system installations more cost effective.

Why are solar panels so expensive?

According to the platform, while some suppliers are still offering solar panels at EUR 0.08 per watt, this price is rising by 15% from February 1. A factor contributing to the higher solar panel prices may be the recent scaling back in polysilicon production.
